

The screenshot shows a web browser window with two main panes. The left pane is a code editor for 'class1.html' containing the following JavaScript code:

```
1 <script>
2   class users{
3     constructor(name,place){
4       this.name=name;
5       this.place=place;
6     }
7     details() {
8       document.write("I am " +this.name+ " comming from " +this.place)
9     }
10  }
11
12  name=prompt("Enter your name :");
13  place=prompt("Enter the place");
14  var obj=new users(name,place)
15  obj.details();
16
17
18 </script>
```

The right pane is a browser preview showing the output of the script: "I am Asha comming from Tvm".
